

QuickStart NS Services: the referral pathway, and who does what

QuickStart NS Services

delivers ESDM-based services · ESDM is the underlying clinical model

Two programs, both ESDM-based:

Parent Coaching

primary · parent-mediated

ESDM Program

supportive · direct-delivery

Referral to PPAS
from partners, families & providers

CI & CC

single point of entry — new under PPAS; receives the referral and runs intake

For a child under 32 months, CI & CC checks the QuickStart capacity tool (maintained by the QS senior team) for a Parent Coaching opening where the child is still under 32 at the start. Triage runs per zone; wait times differ by zone.

Parent Coaching opening available?

Yes → opening held
pending eligibility confirmation at intake

No → onto the waitlist
placed on the QuickStart NS Services waitlist

CI & CC intake meeting (with the Resource Coordinator)

Confirms remaining eligibility (e.g. M-CHAT);
reviews Parent Coaching and the opening; asks
if the family wants to be matched.

Describes QuickStart broadly as ESDM-based (no
program specifics); explains no opening now;
offers the single waitlist and asks if they
want to be matched.

↓ if the family accepts the match

Handover to the QuickStart NS clinical team

QuickStart NS clinical team

owns everything past the handover

Matched to an opening

Enrolled in Parent Coaching

QS admin sets the intro meeting, 4–6 wks before start

The intro meeting orients the family before
services begin.

Placed on the waitlist

The single QuickStart NS Services waitlist

One list, ordered by the date matched. When an opening
comes up in either program, it goes to the next child
still eligible by age.

Child's age	Parent Coaching	ESDM Program
12 – 31 mo 31 d (under 32 months)	one or the other	
32 – 36 mo 31 d (under 37 months)	×	✓
37 months and over	×	×

Families may access only one QuickStart NS Services program.
